

Allied Health Programs Externship, Placement, & Student Sponsorship

Providing Education for (NHA®) Certification in Medical Assisting (CCMA), Phlebotomy (CPT), EKG (CET), Billing and Coding (CBCS) and Electronic Health Records (CEHS).

Great Employees Start as Great Students.

- Are you currently looking for NHA® Certified Medical Assisting and/or Billing & Coding specialists?
- Would you like to be a host site for our externship program and hire well-trained professional students after graduation?
- Do you want to help students eager to start a great career but unable to do so because of their current life challenges?

At Career College of the Pacific, we help students achieve career success by providing affordable vocational education in a supportive learning environment.

In Hawai'i today, Medical Assisting and Billing & Coding professionals are in high demand. We are currently interviewing externship, placement, and student sponsorship sites to see which employers will help our students achieve their personal, financial, and professional goals.

Career College of the Pacific offers some of the lowest tuition pricing in Hawai'i today to help students avoid the student loan trap. But, unfortunately, sometimes that's still not enough. So we designed our Student Sponsorship Program to allow employers to sponsor students, who, in turn, come to work for them when they graduate.

This program gives students a guaranteed place of employment when they graduate, and students can pay back the cost of their education monthly from their paychecks. In some cases, the employer might waive the education costs entirely in exchange for a more extended period of employment. It's a great program that helps us work together to provide a solid career for students who otherwise couldn't afford the cost of college.

Please let me know if you are currently looking for either Medical Assistants or Billing and Coding specialists (or both!) or if you're interested in our Student Sponsorship Program.
